Music for moments
you want to keep going

A music project in Russian

The project

imidjeologia turns everyday encounters into songs about closeness and change. Different voices and styles share one artistic point of view.

A walk lasts one more block. A shared table makes room for someone else. An awkward first attempt becomes a beginning. The project draws on the creator's experience and original poetry. The debut album Pass It On (Передавай) brings six of these stories together.

Song stories

The website connects the debut's stories and original artwork. Short formats can introduce one scene at a time.

02

A conversation

The plan is to share the process in Telegram and invite responses between releases. Publication dates are still to be set.

03

Editorial coverage

Small choices, original poetry and artistic decisions in an AI process offer concrete themes for an interview or feature.

Short formats and the publishing programme are planned, not completed milestones.
